EDUCATION

Massachusetts Institute of Technology | Cambridge, Massachusetts

Aug 2017 - June 2022

- S.B. in Computer Science, Economics, and Data Science, with a concentration in Spanish
- Activities: Captain of MIT Model UN and Mock Trial, Co-Lead of MIT Undergraduate COVID-19 Response, President of Kappa Sigma Fraternity, Varsity Football and Golf, undergraduate researcher

PROFESSIONAL EXPERIENCE

Cloud Infrastructure Engineer, Valon Technologies | New York, NY

October 2025 - Present

- Designed and built a cloud infrastructure platform to protect production databases by dynamically controlling batch workloads, applying backpressure, and enforcing rate and concurrency limits across system components
- Automated database load management by enabling infrastructure-level controls to be configured and applied across applications, reducing the risk of database overload and improving system reliability
- Serve as an on-call engineer responsible for triaging, diagnosing, and resolving production incidents across the company's entire technology stack, from cloud infrastructure and databases to backend services and applications

Senior Software Engineer, Anheuser-Busch | New York, NY

June 2020 - October 2025

Previously: Software Engineer, Associate Software Engineer, General Management Trainee

- Designed and led development of 30+ modular Python utility packages used daily by 500+ engineers worldwide for logging, configuration, telemetry, data transformation, and database/filesystem connectivity
- Built Anheuser-Busch's data ingestion and transformation framework supporting more than \$20 billion in transactions across 20+ countries
- Developed an assortment optimization tool using demographic and sales data to maximize retailer-level revenue, generating more than \$45 million in incremental revenue
- Designed and maintained data and ML infrastructure across North America, including Airflow orchestration, CI/CD automation, backend feature engineering, and clustering algorithms; contributed to frontend development using Flask and React

Software Engineering Intern, Ford Motor Company | Dearborn, MI

June 2019 - August 2019

- Developed Ford Blue Cruise's Connected Blue Zone, the mapping technology that governs access to and behavior of Ford's level two autonomous vehicles
- Integrated Ford Blue Cruise with the Ford Cloud Interface using Java for use by other Ford microservices and allow for direct-to-consumer pushes

Baseball Operations Intern, Oakland Athletics | Oakland, CA

June 2017 - February 2019

- Created from scratch custom player evaluation statistics to find undervalued players by evaluating characteristics of successful MLB and MiLB players, used by A's executives for MLB and MiLB roster decisions en route to the 2018 playoff run
- Wrote machine learning models that analyzed comparative data and trends to project players' performance in future seasons and at different levels of the minor leagues and college baseball, used in player evaluations for the MLB draft and trade deadline

SKILLS

- **Languages:** Python, React, Java, SQL, R, Bash, Julia, Stata
- **Technologies:** Artificial Intelligence, Airflow, Azure, Argo, Databricks, Excel, Git and Github, Google Cloud, JFrog, Kubernetes, Pypi, Reinforcement Learning, SAP, and Terraform
- **Spoken Languages:** English (native) and Spanish (fluent)

MISC.

- **Mobile Application Developer (2026):** Started Oakland Labs LLC, a mobile app development company that produces Provenant, an iOS and Android application to track sports memorabilia collections
- **Donald C. Dilley, Jr. Leadership Award (2019–2021):** Awarded three years while at MIT to a student who demonstrates leadership skills alongside strong academic prowess
- **Ford Technology Innovation Challenge (2019) - 1st Place:** Created a computer vision application using Python to evaluate drivers' attention and prevent drowsy and distracted driving
- **Congressional Gold Medal:** Earned at the recommendation of Congressman Mark DeSaulnier for designing and building durable yet easily repairable pumps to access ground water in mountainous regions of rural Nicaragua
- **Eagle Scout:** Built a storage shed for the Miramonte HS Football team to complete the Eagle project, member of the National Scouting Honor Society (The Order of the Arrow)
